

# Problem-Solving Process

Steps	Questions
1. <b>Define</b> the goals and objectives to be attained.	<p><i>What do we want students to know and be able to do?</i></p> <ul style="list-style-type: none"> <li>• What are the expectations for our students? How are they currently performing relative to these expectations?</li> <li>• How will we know students have reached the expectation for performance?</li> <li>• What is the priority area for focus?</li> </ul>
2. <b>Analyze</b> reasons why the goals are not being attained.	<p><i>Why is this problem occurring?</i></p> <ul style="list-style-type: none"> <li>• What specific skills are needed to close the identified performance gap?</li> <li>• Are current instruction and intervention aligned with student need?</li> <li>• How might the environment contribute to the problem?</li> <li>• Are evidence-based practices used with fidelity?</li> <li>• What additional information is needed to understand the problem?</li> </ul>
3. <b>Implement</b> evidence-based strategies to attain the goals.	<p><i>What are we going to do?</i></p> <ul style="list-style-type: none"> <li>• What will be done?</li> <li>• Continue current supports? Adapt? Intensify?</li> <li>• Who will do it?</li> <li>• When and where will the intervention occur?</li> <li>• How will the team monitor progress and fidelity?</li> <li>• What decision rules will be followed when evaluation data is available?</li> </ul>
4. <b>Evaluate</b> the effectiveness of the plan.	<p><i>Is it working?</i></p> <ul style="list-style-type: none"> <li>• What patterns do the data reveal?</li> <li>• Does progress monitoring show an acceptable rate of improvement?</li> <li>• Is the intervention being implemented with fidelity?</li> </ul>
